

# OIL SPILL IDENTIFICATION

## Fingerprinting, Weathering & Biodegradation

Geotechnical Services Pty Ltd has been a provider of specialised analytical services and consulting to the oil / energy sector and related government bodies in Australia and overseas for over 20 years.

These services include exploration & production (geo)chemistry, environmental chemistry (including ecotoxicology), problem solving chemistry, fuel & lube oil analyses and petrophysics.

Geotech has significant expertise and experience in all aspects of oil spill studies:

- oil fingerprinting and correlation of spills with suspected sources
- weathering studies simulating a range of geographic conditions
- biodegradation projects assessing biodegradability of oils and other chemicals in the environment.
