

SPECIALTY CHEMICALS & FUEL TREATMENTS

This division manufactures the Gold Standard Premium Product range of chemical formulations for the treatment of fungal and bacterial growth in diesel fuel. These include Geotech's two most popular products, CLADOCIDE GOLD and BIO-KILL, which are formulated as broad spectrum biocides for the prevention of this contamination.

"THIS DIVISION
MANUFACTURES CHEMICAL
FORMULATIONS FOR THE
TREATMENT OF FUNGAL AND
BACTERIAL GROWTH
IN DIESEL FUEL"

Several forms of microorganisms can survive and multiply in hydrocarbon products and fuels, growing in fuel handling systems, storage tanks, fuel delivery trucks, delivery lines and the fuel tanks of machines. This causes problems such as fuel tank gauge damage, injector and pump failures and filter blockage.
